

Information Security Policy

Information Security Policy

HB Projects recognises that we have a responsibility to protect all of the data we hold or process, whether it belongs to HB Projects, our employees, partners, clients or suppliers. By protecting this data, we can ensure that we maintain our reputation as a trusted employer and partner, enabling HB Projects to grow as a business and deliver a high performing service.

To demonstrate our commitment to information security, HB Projects implement best practice security controls and assure the effectiveness of our controls through certification to ISO 27001:2017, the international management standard for information security.

This standard promotes a commitment to preserving the confidentiality, integrity and availability of all the physical and electronic information assets throughout the organisation. It is the responsibility of all employees (permanent or temporary), to become familiar with our security management processes and to comply with all information security, privacy policies and the procedures that underpin them.

Management objectives and targets shall be established through a framework and reviewed on a regular basis to implement the Information Security Policy.

The Company is committed to ensure our security management systems and processes are efficient, effective and continually improving to protect our

data assets, our stakeholders and on-going good reputation.

The Directors commit themselves to provide adequate resources to implement and communicate this policy effectively to all employees.

The Company's performance and the operation of the management system are audited and reviewed to ensure maximum operating effectiveness.

This Policy will be reviewed at least annually or when legislation demands

Ed Beck
Managing Director
